Foreword of the Foundation's Administrator

Dear friends,

the year 2018 will be written in the history of Slovakia as a time when the society demanded a change: the change in the social-political space and even broader, in democratic concept.

From the position of the Foundation's administrator, I am allowed to say that especially at this time we must be aware of good deeds importance, the role they play - regardless political preferences and social integrity they connect people and help various social classes.

In 2018 Kia Motors Slovakia Foundation projects were focused on education development, sport, mobility and volunteering.

As a response to the challenge of 21st century education, we opened the grant Smart Region 2018 allowing more than 40 elementary schools from Žilina region purchase sets of programmable Lego robots; equip technical workrooms with new tools or language classrooms with new technologies. We also included teachers training and special software, which help with class's preparation, explaining subject matter, testing pupils directly during the class time via computers or tablets and assigning homework.

In the employee grant program Sport in the Region we received in 2018 more than 200 applications from organisations which wanted to build or revitalise sport areas, improve material equipment or organise sport events for children and young people. In cooperation with Filip Polc, former world champion in the urban downhill bicycle race, we built a unique Pump track course in Žilina, where you move by shifting the weight of your body, without pedalling a bicycle or bounce on a scooter.

Within mobility support we donated new cars to the Slovak Red Cross, which will get workers and volunteers closer to people in need. We also launched a long-awaited bike sharing project called BikeKIA. Žilina's residents and visitors may use and share these bicycles free of charge.

Volunteers in 2018 worked a total of 781 volunteering hours, during which they revitalized public areas serving the public for rest, education or sport activities.

Each of the 205 projects that we supported in 2018 was carried out with the idea of creation a better world around us, and every cent from a total of 1,800,000 EUR was a targeted investment into the future of our country and its citizens.

With great gratitude towards our partners for everything we achieved together in 2018, we begin 2019 full of new challenges and with determination that we can be the change.

Dušan Dvořák
Administrator of the
Kia Motors Slovakia Foundation

About the Foundation

The Kia Motors Slovakia Foundation (hereinafter referred to as "Foundation") was founded by the company Kia Motors Slovakia s.r.o. in 2013 as the bearer of its philanthropic and community activities in the Žilina region and in Slovakia. The Foundation launched its first projects in the field of philanthropy and donating in 2015. Its assistance is mainly focused on supporting sport activities, the development of education and the spreading of volunteering. In 2018 the Foundation supported a total of 205 philanthropic projects with amount of more than 1.8 million EUR.

Vision

Through community service activities we want to lend a helping hand where our help is needed and where focus is in harmony with the areas of support we devote ourselves to. We follow the slogan:

"Let's move the world together."

Mission

The Foundation's mission is to be a trustworthy and reliable partner for the community, Žilina region and Slovakia. The Foundation wants to fulfil the social responsibility of its founder, the company Kia Motors Slovakia, and to actively seek for new challenges that will transform the surroundings into a better world.

Foundation Bodies

Administrative Board

Dae-Sik Kim

Chairman of the Administrative Board and President and CEO of Kia Motors Slovakia

During the summer holidays we organised the **Children's English University** for the fifth time. A total of 240 children from the Žilina region, divided into 4 courses were educated with the help of professional lecturers of English language via games and interactive activities.

The Kia Motors Slovakia Foundation continued in a successful collaboration with the **Žilina Faculty Hospital with Polyclinic**. The New-born Department was gifted with 55 new cribs, enabling comfortable sleep and babies' movement to mothers and hospital staff. In addition to their modern and ergonomic design, the cribs meet high standards of quality.

"We wanted all mothers, who decided to get birth at this facility, to indulge convenience and comfort, which they deserve and also fully enjoy the first moments with their babies," said the administrator of the Kia Motors Slovakia Foundation.

At the water dam in Žilina together with Filip Polc, a former world champion in urban downhill racing, we built a unique **Pump track course**, which have immediately became a popular among the public.

Riders can move along it using a special “pumping” technique – transferring the weight of their own bodies. We hope that new talents will come out from here and will successfully represent us one day in the future.

In 2018 we organised a Children’s Skiing School during the spring holidays, 96 children aged from 6 to 11 years old from the Žilina region participated. The Foundation provided certified ski instructors for the young skiers in the popular locations – Vrátna Free Time Zone and at the Snowland Valčianska dolina resort.

“I want to say thanks for the fantastic course; my daughter had a great time and learned to ski properly. Thank you!”
told us happy mother Katka

In 2018 we launched in the city of Žilina a long-awaited project of public bicycles, so-called bike sharing, under the brand name **BikeKIA**. The Foundation provided the hardware and software and also financed the development of the web page and application as well as the customer service. In next 5 years, the city of Žilina will participate in the co-financing of maintenance, which is currently being done by the company Arriva Slovakia s.r.o. Since April 2019, the citizens of Žilina, people traveling to work as well as tourists can enjoy 120 bicycles, which are distributed in 20 locations around the city of Žilina. We are pleased to contribute to improving the environment as well as the health of all users.

At the end of November 2017 we delivered to the Slovak Red Cross in Bratislava the first 20 cars Kia cee'd Sportswagon, distributed to 20 territorial branches in Slovakia. Since the Slovak Red Cross works throughout Slovakia, the Foundation delivered in 2018 additional 17 cars and thus renewed the fleet of personal automobiles. The Foundation's gift also included winter tires and a financial gift for the registration of all the cars.

Partnership Projects

a total of
28
Projects

Total amount of support:
340,498 EUR

One for all to Sport, the Civil Association One for All

New sport equipment contributed to improving training programs in Žilina. The Catapult system revealed several deficiencies in training, which led to a change in the processes used and improvement of the young athlete's performance.

Inclusion by Playing, the Slovak Special Olympics Movement

The healthy and the disabled get to know each other better when they do sports together. Therefore, the Slovakia Special Olympics Association prepared the project Inclusion by Playing, which is a part of the Young Sportsmen program, in the scope of which they received aids for training for more than 800 children from socially disadvantaged families and special schools. Pupils with mental disabilities and those without disabilities took part in the project, thanks to which they came to know one each other and made new inclusive friendships.

Green sporting grounds for all, Reflex Žilina

Near the village of Teplička nad Váhom, members of the archery club Reflex Žilina revitalized unused pastures and built an outdoor multifunctional area for archery and for organising sporting-recreational events for the public.

Generation 3.0, Pontis Foundation

Along with the Pontis Foundation and with other partners, we were a part of the project Generation 3.0 focused on a change in education from the bottom up and thus directly from the ranks of teachers and lecturers. Schools or non-profit organisations had the opportunity to nominate their own innovation projects. Winners obtained a financial grant to carry out their project, and all finalists got the opportunity of free consultation from subject matter experts, finance and marketing areas to ensure the sustainability of their projects.

Partnership Projects

Children's corners, Žilina Self-Governing Region

Relaxing and gaming corners for parents and children were built and modernized in the four hospitals and one polyclinic of Žilina County. New spaces were equipped with changing tables, armchairs for nursing mothers, children's furniture and toys.

Four-leaf clovers for talent, LECA

71 talented children and youth from socially disadvantaged families in Slovakia and Czech Republic could develop their talent in several artistic areas. A component of the project was a benefit gala evening that we financially supported.

The art of learning/The learning of art, Truc sphérique

More than 3,000 children and youth from nursery schools, elementary schools, secondary schools and universities took part free of charge in creative and educational activities at the cultural centre New Synagogue. The educational programs were carried out in an experiential form. Participants did not receive information passively but they were forming, discussing and getting involved to activities or creative tasks solving.

Grant Programs

144
projects

Sport in the region – employee grant program

Total amount of support:

588,642 EUR

Thanks to the support of the Foundation, various tournaments, training courses and summer sports camps were held in 2018, and equipment for clubs and schools has been improved. The greatest representation was in football, but supported activities also included nearly all types of sports, from fitness, through table tennis, firefighters' competitions, running, tennis, dance, cycling, martial arts, swimming, chess or figure skating.

Day of Untraditional Sports, Health education in Žilina

More than 300 pupils of the Health Care Secondary School in Žilina got involved in the innovative sport day called the Day of Untraditional Sports.

Students had the chance to try special slalom, skipping, frisbee or tug-of-war and very interested were less known activities, such as Kubb, Ringo, Petang or Kin-ball. Untraditional sport activities brought the sports and their country of origin closer to the audience and helped to strength the collective of students and their teachers.

Sports day, Nesluša Primary School

This sports day, organised with the help of a Foundation grant, allowed pupils to learn about the surrounding nature. Aside from movement, the pupils received knowledge about trees, plants and their surroundings as well as skills in tying knots.

Grant Programs

Smart region – grant program education

Primary schools from the Žilina Region applied for one of the offered grants for the support of education:

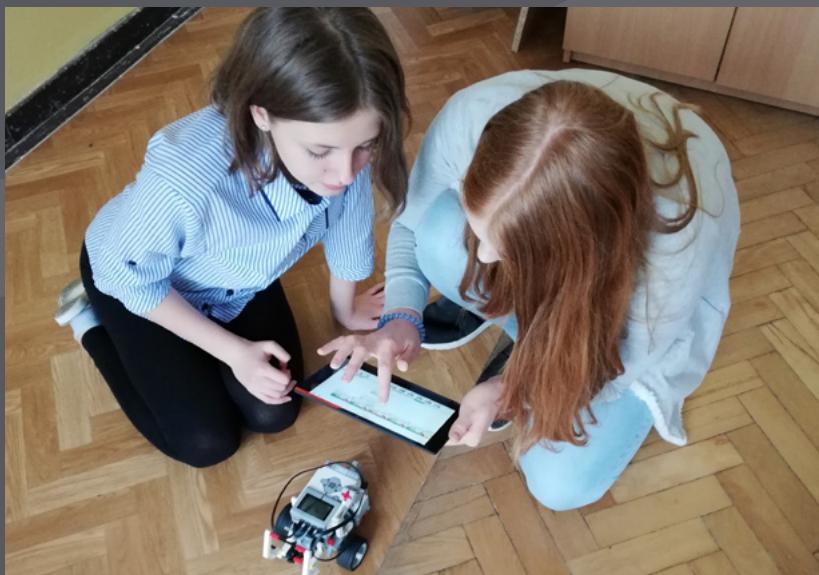

Technical Workshop Grant

Six primary schools used the grant to purchase equipment, such as tables, drills, grinders, vices etc. for a technical workshop. The new aids contributed to improving instruction for technical education and enhance manual skills of pupils.

Smart Lego Grant

Eight primary schools, thanks to the Foundation financing, procured programmable Lego sets and tablets for the support robotics education and programming. Along with this, schools also received year-long support for lecturers, including teaching materials for programming classes, which each of the selected primary schools organise for their pupils once per week.

Digital Classroom Grant

Seventeen primary schools acquired with the Foundation's support digital classrooms with tables, laptops and interactive boards with software for the support of teaching languages and technical subjects, such as mathematics, physics or chemistry. A component of the software was the year-long support for lecturers and education of teachers at selected schools.

Smart Software Grant

Eleven primary schools received from the grant professional software to support the teaching of languages and technical subjects together with lecturers support for whole school year.

Grant programs

Volunteering – employee grant program

In the course of the volunteering grant program activities were supported with partner non-profit organisations, such as the Association for the Protection of Lietava Castle, the Rescue Station and Ecocenter Zázrivá, Preles, the Social Services Centre Synnómia, Rozum a Cit, The Žilina Diocese charities and others, where volunteers revitalized their surroundings.

Employees of Kia Motors Slovakia repaired grounds, planted trees, cleaned peat bogs, painted fences or assembled furniture.
